Reg No: 2023-BSE-057

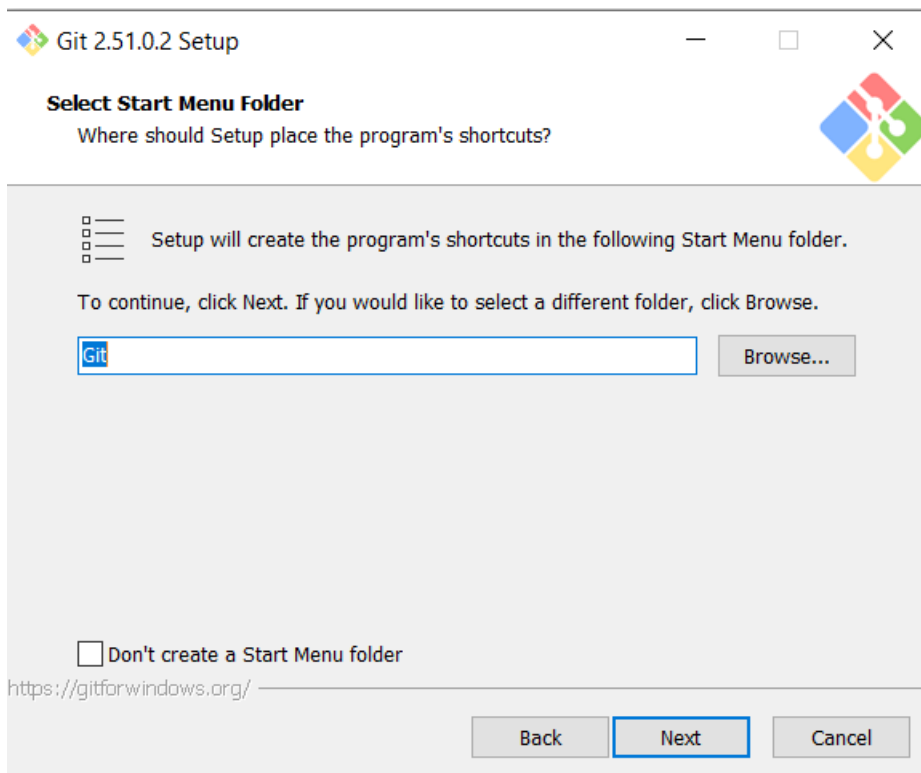

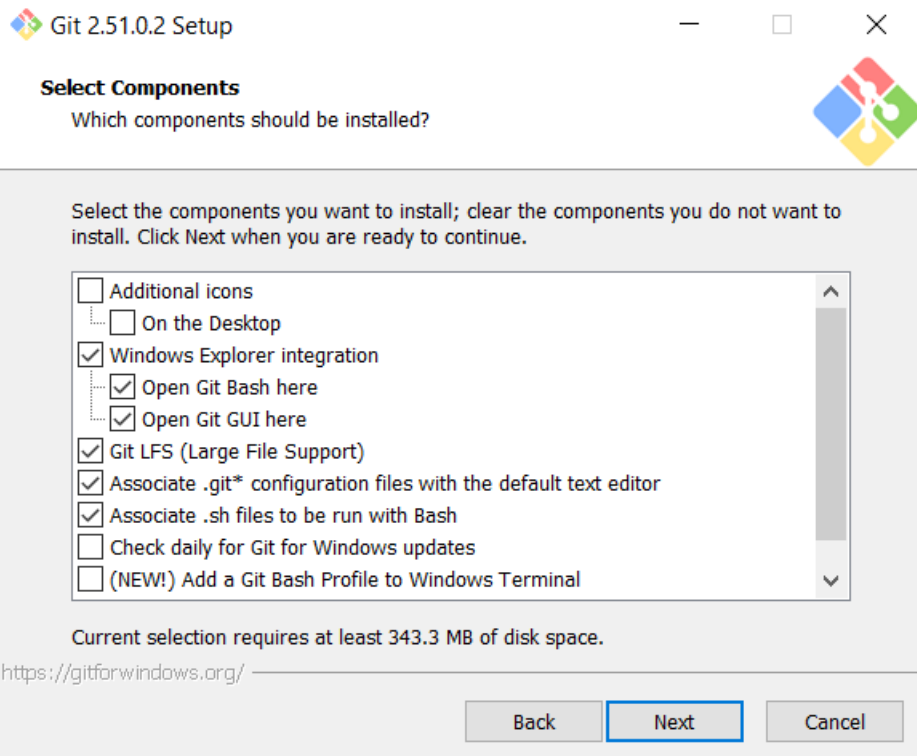

Section: 5-B

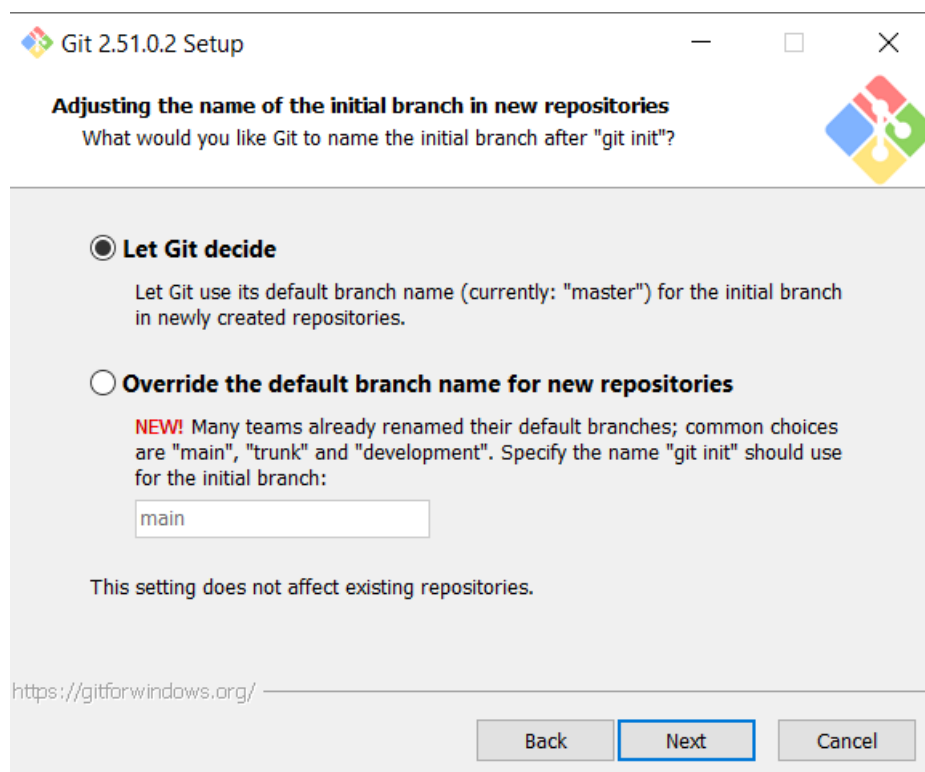

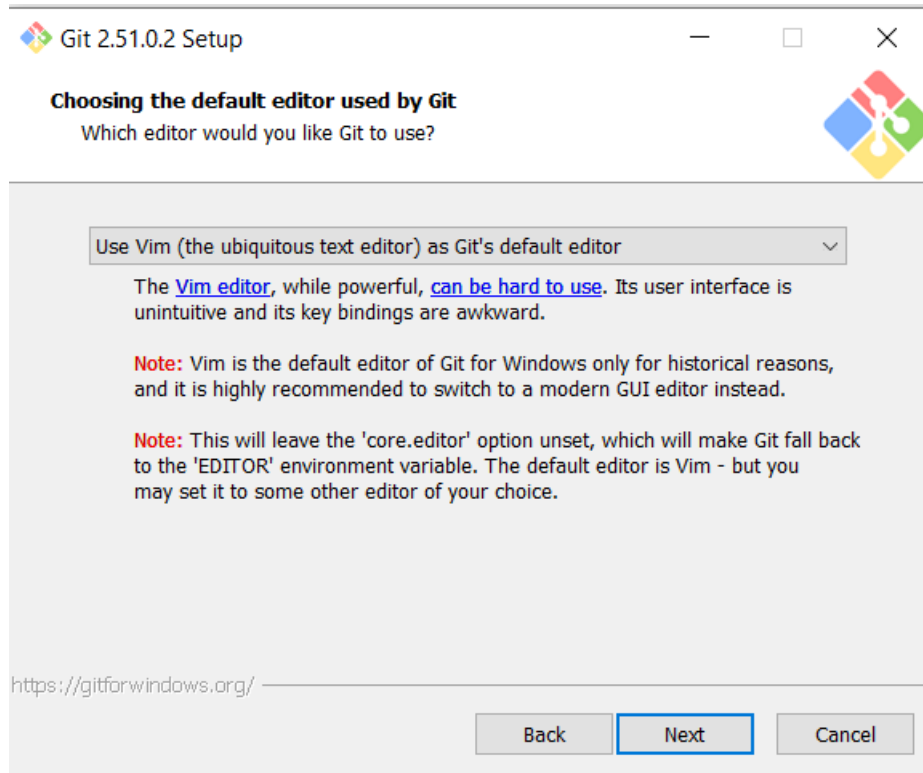

LAB NO 2:

Git Installation

1. Install Git on your PC.
- [Download Git for Windows, Mac, or Linux](#)

Adjusting your PATH environment

How would you like to use Git from the command line?

☐ **Use Git from Git Bash only**

This is the most cautious choice as your PATH will not be modified at all. You will only be able to use the Git command line tools from Git Bash.

☒ **Git from the command line and also from 3rd-party software**

(Recommended) This option adds only some minimal Git wrappers to your PATH to avoid cluttering your environment with optional Unix tools. You will be able to use Git from Git Bash, the Command Prompt and the Windows PowerShell as well as any third-party software looking for Git in PATH.

☐ **Use Git and optional Unix tools from the Command Prompt**

Both Git and the optional Unix tools will be added to your PATH.

Warning: This will override Windows tools like "find" and "sort". Only use this option if you understand the implications.

Choosing HTTPS transport backend

Which SSL/TLS library would you like Git to use for HTTPS connections?

☐ **Use the OpenSSL library**

Server certificates will be validated using the ca-bundle.crt file.

☒ **Use the native Windows Secure Channel library**

Server certificates will be validated using Windows Certificate Stores.

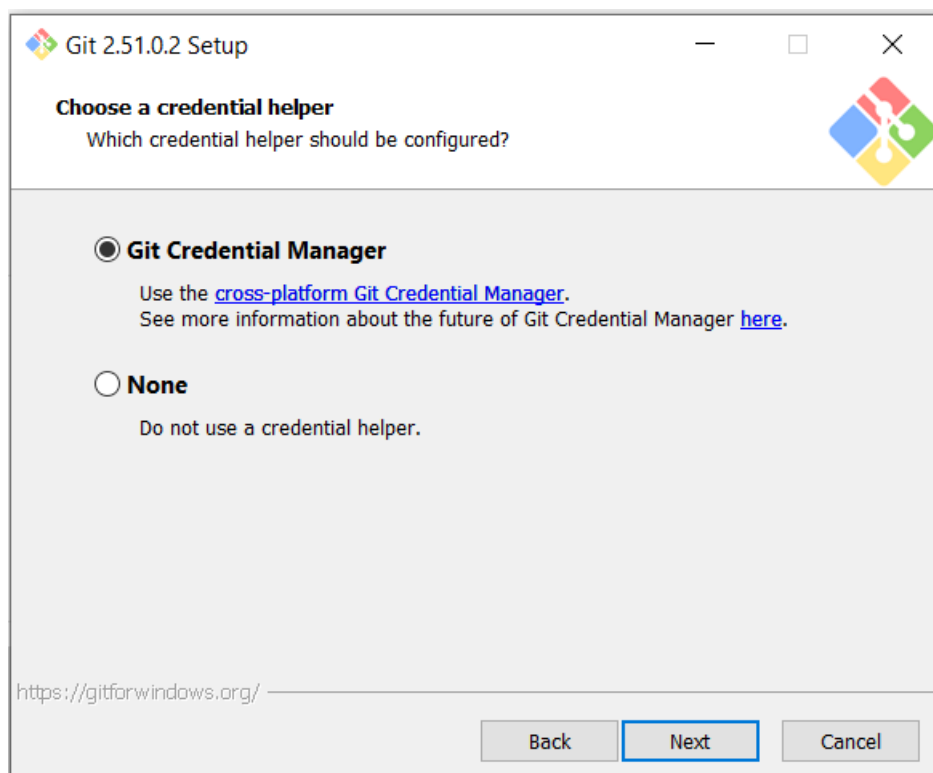

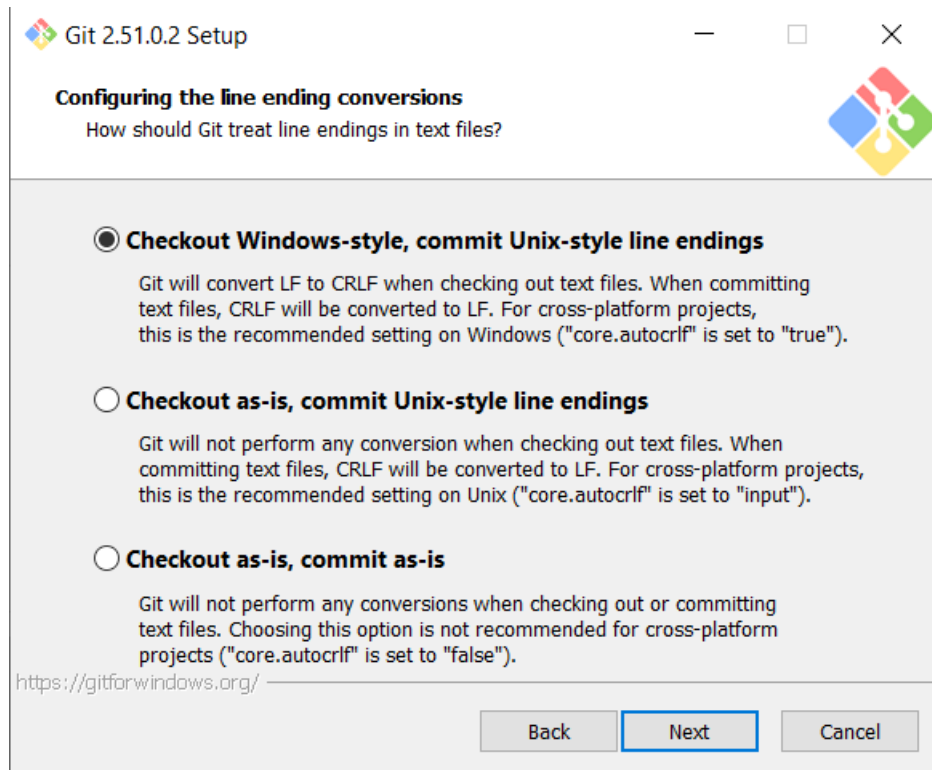

This option also allows you to use your company's internal Root CA certificates distributed e.g. via Active Directory Domain Services.

➤ Task 1:

Create Private GitHub Repository

1. Create a new private repository named **Lab2** on GitHub.

```
Syed@DESKTOP-S50GK51 MINGW64 ~  
$ git --version  
git version 2.51.0.windows.2  
  
Syed@DESKTOP-S50GK51 MINGW64 ~  
$ |
```

3. Delete the branch

The screenshot shows a GitHub interface. At the top, a comment from user 23-22411-057-sudo is shown, stating 'Reverts #1'. Below this, a commit history is visible, including a 'Revert "Pull Request 1"' commit (verified, 22ed475) and a merge commit '23-22411-057-sudo merged commit cfbe442 into feature/db-connection' (now). A button labeled 'Revert' is next to the merge commit. Below the history, a message states '23-22411-057-sudo deleted the revert-1-main branch now', with a 'Restore branch' button. A summary box indicates 'Pull request successfully merged and closed' and 'You're all set — the branch has been merged.' At the bottom, there is a 'Add a comment' section with a text input field and a rich text editor toolbar.
